

Parking Lot Repaving

The project to repave our main parking lot and the lot behind the Little Church is beginning! The entire project, which also includes repairs to sections of curbs and sidewalks, should take about 3 weeks to complete, depending on the cooperation of the weather. We will do our best (if Mother Nature cooperates) to time the laying of the asphalt layers so that parking for Sunday Masses will not be greatly disrupted (apart from the absence of line markings). Those coming for daily Masses, however, will need to watch for areas of the lot that are blocked off each day. While we will do our best to minimize the inconvenience, a project of this scope will necessarily involve a bit of disruption. Your patience is much appreciated!

The painting of lane lines and sealcoating the main driveway will be the last items completed. Once the repaving project is done, we will look to replace the lighting in the lot with brighter and more energy efficient LEDs.

The main lot, which dates to the construction of the new church nearly 20 years ago, has been showing its age for the past few years. Repeated patching could no longer keep up with the deteriorating surface. Therefore, to ensure safety and ease of access, repaving the parking lots was included in the scope of the *To Teach Who Christ Is* capital campaign that began in late 2016. Thanks to the generosity and commitment of the many parishioners who continue to support TTWCI, we are about to realize this goal!

Thank you to our donors for your generosity that is making this important improvement possible. And thank you for your patience and flexibility while the work is being done.
